- RENOVATIONS
- REHABILITATIONS

It is with pleasure that I recommend to you Tim Miller and Felton Electric for your electrical needs. Tim is one of the most diligent and dedicated individuals I have known and he will make an outstanding contribution to any project to which he becomes committed.

Tim and I have worked together for 20 years and over that time period I have not seen any assigned task from which Tim (Felton Electric) has shied. Tim (Felton Electric) scope of work with Nyman Construction ranges from emergence service calls to a recently completed factory addition in excess of \$300,000 thousand. He has a broad practical experience in electrical project management for the delivery of construction projects; from the early phase tasks of planning, estimating, scheduling; through the bidding, procurement and contract execution phases; as well as overseeing the of field execution. Tim works closely with the project superintendent to insure that the documentation required to properly manage a job is in place and up to date. Tim is experienced and thorough in project closeout as well and will make sure that attention to detail is applied from start to finish.

Tim works extremely well with project team and is proactive, while remaining communicative. He presses the progress forward while keeping management current and apprised of the status of relevant issues.

I would be pleased to discuss further any individual aspects of Tim's experience, but I recommend him highly for electrical work in the construction industry.

Very truly yours,

Michael Nyman
President
